

## Higher Study Pack Final Exam

The material in the pack will help you review your learning and prepare for Final Assessment

1) Key knowledge sheet, remember the key info for the exam. I recommend practice testing using the blank version and checking your answers until 100%.

2) Complete the three past papers and check answers using worked solutions.

Do these at intervals until you can achieve above 80% for each past paper.

There is a link to video solutions below,

Written worked solutions are in the study pack

Due to the modification to this year exam only do the questions outlined.
